

NxEco APP 1.5.5

NxEco APP 1.5.5 is now available! Several significant changes are going to provide friendlier experience. Here are the highlights:

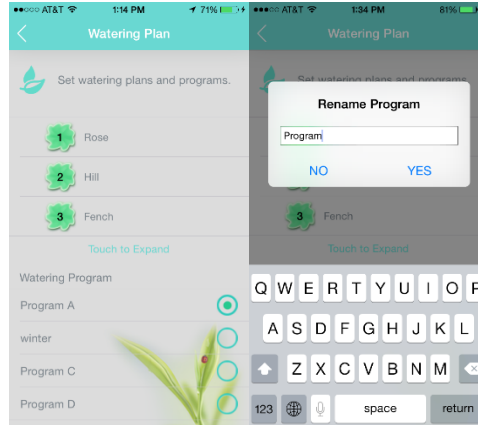

New Watering and Scheduling Page:

- Easy to touch the larger zone buttons.
- Name each zone on both pages. (Zone 1 -> Rose, Zone 2 --- > Hill)

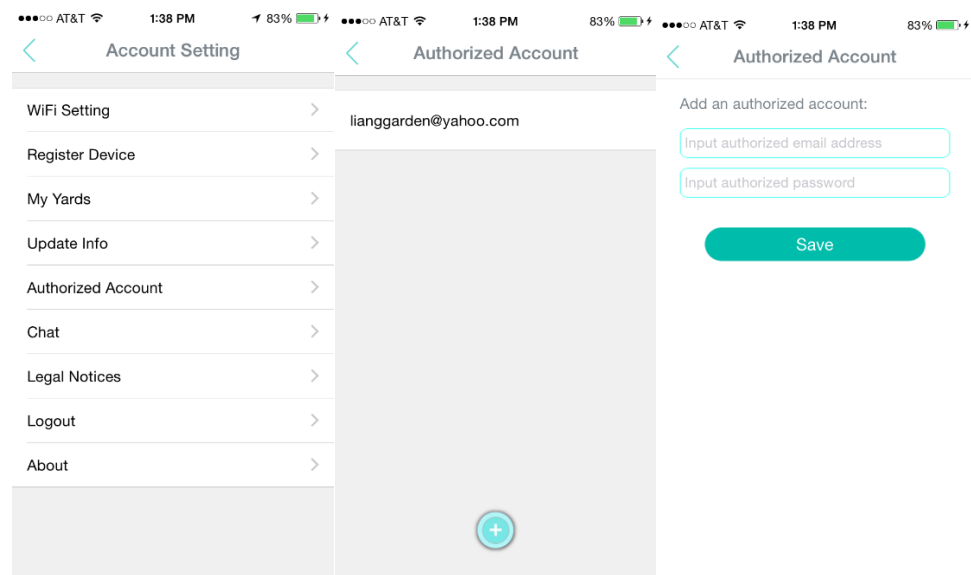

Scheduling Program (s):

- Program (s) are added (Program A, Program B, Program C and Program B). In each program, a group of schedules on zones are saved. The program could be name as Summer, Winter and others These schedules could be the saved for different environment or special applications.

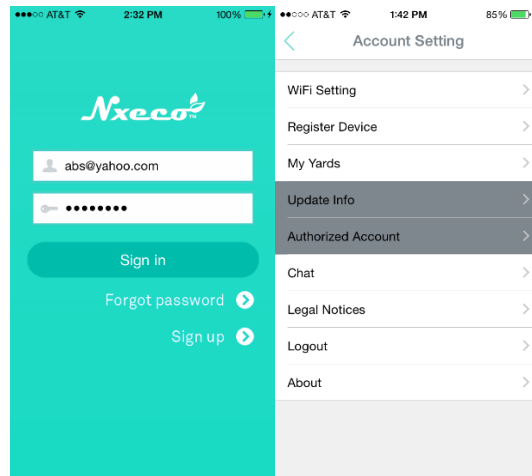

Authorization Account

- If users ask his/her gardeners to water landscape, he/she could authorize one Authorized Accounts to gardeners in following steps

- Open profile and enter Authorized Account page
- Input Authorized Account and Password. Save!

- As gardeners log in Smart Garden APP with authorized account, he/she could do any watering operation except Update Info and Authorized Account.

Smart Watering

- The Smart Watering page is re-formatted. The big green circle suggests the watering percentage on your duration from current and following daily weather info.
- As touch green circle, enter fine-tuning page. By fingers, the watering percentage may be adjusted by yourselves.
- Save. The green circle becomes one blue circle.
